

Glasgow Homelessness
Involvement & Feedback Team

People with first-hand experience of homelessness in Glasgow, informed by research and evidence, co-leading the systems, practices and culture change we need.

Our priorities are:

Housing, not shelters. Because home is the best place to build our lives

Tailored services, not one size fits all. So that we can all get the support we need, when we need it.

Doing better, not more of the same. Evidence and people tell us what needs to change, we need to listen.

More understanding, less stigma. Because stigma keeps people down and locked out of society.
